and over it. This is  
the way in Canada,  
where the country is  
good. I am in such a  
place now. Look at  
the town of Etobicoke.  
It is lower than the  
rest of the country  
and has big fields  
of grass and flowers  
and trees and hills  
and waterfalls and  
waterfalls and  
waterfalls.

in dry soil. It  
is not now visible  
as it is covered by  
a pile of stones.  
The first side -  
which was to the left  
of the main one  
- had a large  
part of its surface  
erased. The  
grey stone  
was broken in  
several pieces.

6. This is a large oval  
stone, weighing about 100 lbs.  
It is 2 ft. 6 in. long, 1 ft.  
wide, and 1 ft. 6 in. thick.  
The surface is rough and  
irregular, showing signs of  
weathering and erosion.  
The top surface is flat,  
but the sides are slightly  
inclined. The edges are  
sharp and well-defined.  
The stone appears to be  
of a light-colored material,  
possibly limestone or  
marble. It has a smooth  
surface, but the edges are  
rough and irregular.
